

300 FLY

Galeon 300 FLY, an entry model to the third-generation lineup is a worthy addition and a fully featured unit. This compact sized flybridge was designed from scratch to offer great handling and stability in all weather conditions. Both the hull and deck are made using the infusion technology which helps in minimizing the weight, enhancing the craft's performance and lowering fuel consumption.

The dynamic exterior clearly follows the design trend outlined by the third-generation of Galeon Yachts range with its broad windows and edgy features. The top deck is easily accessed by the built-in, wide steps and features a steering station with a convertible bench that extends the large sundeck area even further. The passengers will surely make use of the conveniently planned cockpit which is available with either a fixed bench or a fold-out seating, perfect for sunbathing.

The main deck is occupied by a sizable dinette and opposite facing galley with the helm station moved forward. The interior finish is available in several distinct designs including Oak and Walnut, with plenty of customization options at the client's disposal. Down below, two double, standing height cabins and a bathroom complete with head and shower await the guests. Both single and twin petrol or diesel engine installations are available.

Flybridge line

This entry level flybridge is the gateway to the Galeon range. With commendable performance and handling as well as a wide variety of available equipment it is truly a compact phenomenon worthy of the third-generation badge.

— The entry level flybridge model offers plenty of space on board

— Swift handling in all weather conditions

— Second steering is available on the top deck

300 FLY - Walnut

A clever interior arrangement allowed to fit a large dinette opposite the galley area.

— The side window will open manually to let the breeze in

— Forward owner's cabin with double bed

— The guest quarters will sleep two in comfort

— Bathroom with head and shower

300 FLY
