

INTRODUCING THE NEXT-EVOLUTION

250 DAUNTLESS

BOSTON
WHALER

BOLD PAST. FEARLESS FUTURE.

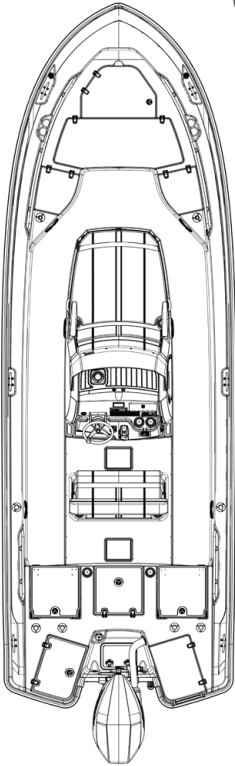

For decades, the Boston Whaler Dauntless series has led the industry in confident performance and multitasking capabilities. The all-new 250 Dauntless marks the next chapter in a history of leading the way. Smooth-riding performance and a spacious center console layout combine with amenities for fishing, watersports, leisurely cruising and running inshore as well as offshore. For boaters seeking a higher-quality bay boat experience, there's only one way to be: Dauntless.

LAUNCH VIDEO.

“*The Dauntless is like a hybrid, but better, because there are zero trade-offs. So not only does it ‘do it all,’ it actually does it all very well.*”

— **Kenneth Beauregard,**
Regional Business Manager

NOT YOUR AVERAGE BAY BOAT.

What makes the 250 Dauntless stand out from the pack? For starters . . .

- **BETTER THAN BAY:** Performing well above and beyond the typical bay boat, the new Dauntless can go farther offshore and handle rough inlets with confidence, thanks to an improved deadrise and shearline that sit the boat deeper in the water.
- **OUT OF THIS WORLD, NOT OUT OF REACH:** The 250 Dauntless delivers incredible quality and value that you can see and feel, making it worth every penny. Its ability to support multiple activities comes with no trade-offs in terms of comfort or craftsmanship.
- **FITS THE MISSION:** As an ideal platform for fishing, watersports, cruising and everything in between, the 250 Dauntless brings the family together in one sleek platform that lets everyone enjoy their favorite boating activities.
- **UNINHIBITED CONNECTION:** With its flat stern deck, large swim platforms, angled swim ladder and more, the new Dauntless fosters a deeper connection with the water for boaters who want to be in it as well as on it.
- **SPACIOUS AND COMFORTABLE:** With nicer forward seating than a bow rider, and the free-flowing onboard movement of a center console layout, the 250 Dauntless is a brilliant choice for boating on inland lakes and along the coast.

FEATURES & OPTIONS FOR ALL-DAY FUN

(A) INVITING BOW - The 250 Dauntless offers ample seating throughout, including a plush two-person lounge forward of the console with armrests and drink holders; and forward bow seating with flip-up backrests and an under-seat fishbox.

(B) SMARTER STERN DECK - Now flush rather than stepped-up, the stern deck features two ergonomic fold-down seats and a center livewell, making it a prime spot for casting a line or riding in comfort.

(C) GREAT FISHABILITY - Whether you're new to fishing or an experienced pro, count on the 250 Dauntless to empower catch after catch. Fishing features include T-Top rod holders, a large stern casting deck, an available reversible pilot seat with 32-gallon livewell, and an optional MotorGuide® trolling motor.

(D) MAJOR STORAGE - Store everything you need for a full day on the water and access your gear easily. The deep, lockable storage garage beneath the forward lounge seat is just one example: It has space for multiple fishing rods, buckets, life jackets, ropes and more.

(E) ACTION-PACKED - Eager to carve turns behind the boat, or treat your kids to the thrill of tubing? Choose Whaler's optional All-Activity Tower® (*not shown*) to gain ski & wakeboard racks and a watersports tow point.

(F) SUPERIOR RIDE QUALITY - Whaler's exclusive Unibond™ construction method and a precision-engineered hull with 18 degrees of deadrise ensure a soft, smooth, stable ride. State-of-the-art Mercury® propulsion delivers ultra-reliable, efficient performance.
